Monique Bedwell is a Sydney based interdisciplinary artist completing BFA (Hons) at UNSW and exploring self-discovery through her arts practice. Her mediums vary in her quest to capture different components of her life. Drawing, 2D animation, sculpture, painting and interactive installation are considered equally significant to Bedwell's practice. World travels and everyday interactions are primary influences for Bedwell particularly how unique interactions enable her capacity to learn—developing a deeper understanding of self and representing this in her works is considered a perk. The result is a developing body of work that communicates the journey toward establishing herself as an individual and an artist.
